RENEGADE FOREARM INSTALLATION

Warning: Always verify your rifle is unloaded prior to installing any parts!

The Renegade forearm and Optics Mount Top Covers are compatible with the following weapons:

Yugo PAP M92 and M85 pistols i.e. "Krinkov"

The following is included in the kit:

- (1) Renegade polymer forearm
- (1) Polymer top plate

You will need the following tools:
Small file and hammer (optional)

STEP 1:

Remove the magazine from the firearm, pull back on the charging handle and ensure the chamber is clear of live ammunition. Let the charging handle go to the forward position and place the rifle on "SAFE"

STEP 2:

Disassemble the firearm per the manufacturer instructions, including removal of the gas tube, the wood from the gas tube and the wooden forearm. **MAKE SURE TO**

ALSO REMOVE THE METAL REINFORCEMENT ON THE BACK OF THE WOODEN HANDGUARD

– sometimes it will stay stuck in the receiver, and the Renegade forearm will not fit with the metal reinforcement still in place on the weapon.

STEP 3:

Install the Renegade forearm in the same manner as the original wooden forearm. On most weapons it will be a snug fit but require no fitment. You may need to tap the front handguard retainer with a hammer to make it seat properly. The rear edge of the Renegade should be flush with the receiver when properly seated. If it will not seat, LIGHTLY file the rear lug until it will fully seat. Snug is good!

NOTE: The slots on the sides and underside of the Renegade forearm can be used to mount any Manticore Arms ARC LOK accessories.

POLYMER TOP COVER INSTALLATION

STEP 1:

Rotate the polymer top cover onto the gas tube the same way you rotate the wooden handguard on to the gas tube. Install gas tube and adjust polymer top cover to fit level and flush with the Renegade forearm.

STEP 2:

Reassemble your weapon and do a function check per the manufacturer's instructions to make sure it operates properly.
